

THE SALAMA STOVE MISSION PROJECT

Making a Difference-One Stove at a Time

Hebrews 13:16
¹⁶ Do not neglect to do good and to share what you have, for such sacrifices are pleasing to God.

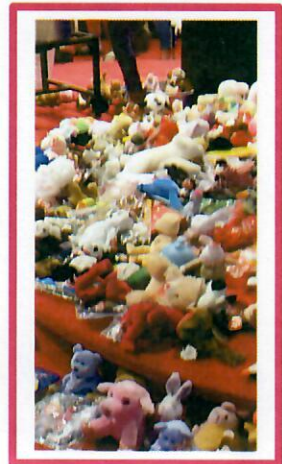

A BEANIE BABY TREE

Dr. Stice emphasized "the need for prevention to combat the devastating problems in the Kenya population." She demonstrated the construction of the Salama stove which features an enclosed fire furnace, safe cooking stove top, a hot water reservoir with a faucet and a chimney to emit fumes. After the church service, Dr. Stice actually fired up the stove outside for the congregation to view.

BEANIE BABIES FILLED THE ALTAR

Nurses and Doctors use the Beanie Babies to bring joy to a patient and also for easier contact and care with young and old. It is a status symbol to have a Beanie Baby and patients covet their toy.

The Laurel UMC Outreach Committee would like to thank everyone who has donated to the Salama Stove Mission project. We received over 690 Beanie Babies and \$5698 was presented to Dr. Stice, which is enough to purchase 28 stoves. Dr. Stice was very appreciative and overwhelmed by the generosity and said "thank you so much. You have just helped an entire village." The Outreach Committee hosted a dinner after church and served 74 people. Members of the committee commented, "this mission project has its base in Omaha, Nebraska yet serves as an international mission too. "

Pastor Dr. Dave York emphasized that the church has a vision of seeing the Kingdom of God working in faraway places as well as in local mission ministries."

Dr. Stice and Outreach Committee members (L-R) Kevin Wacker, June Erwin, Joan Adkins, Karen Rasmussen, Diann Lake & Roy Stohler
